
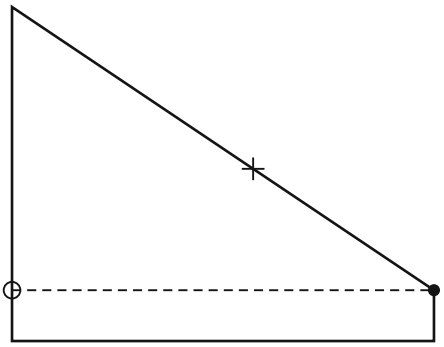
Horizontal · 33.87° S, 151.21° E

Horizontal · 33.87° S, 151.21° E. Local apparent solar time. Australia/Sydney; design date 2026-12-21. Radius 90 mm. Lay flat with the top of the design toward true north. The style rises 33.9° above the plate toward the south celestial pole. Nodus 28.8 mm along the style from its foot.

100 mm calibration - verify before cutting

Gnomon - cut and fold

A4 | plate radius 90 mm | print at Actual size / 100%



Cut the solid outline. Fold the tab 90 degrees at the dashed base. The triangle stands perpendicular to the plate; its sloping edge rises 33.8688 degrees above it.

Mount the plate on flat backing. Match the filled foot dots and the open base-end circles; align the dashed base with the plate's dashed mounting line. Secure the tab to the backing; it may overhang a fan's point.

Base 55.80 mm; rise 37.45 mm; style edge 67.20 mm. Keep the triangle upright, not laid flat on the plate.

The cross marks the nodus, 28.80 mm along the style from the filled foot dot. Add a small bead or notch there to cast a distinct date-line shadow; an ink cross alone will not do this.

Use a thin shadow-casting edge. Material thickness, kerf and fold allowance are not compensated in these templates.

Lay flat with the top of the design toward true north. The style rises 33.9° above the plate toward the south celestial pole.
