Assemble your sundial

2 columns x 2 rows / 4 full-size sheets / LETTER

Radius 150 mm. Overlap 10 mm. Print one-sided at Actual size / 100%.

Disable Fit, Shrink and extra poster tiling. Check each bar and the frame's width and height.

ASSEMBLY MAP - reduced size, not a cutting template

1. Keep all sheets facing the same way. Start at R1C1, then work across each row.

2. On columns after C1, trim the left blank margin at the dashed frame. On rows after R1, trim the top blank margin there. Keep the printed overlap.

3. Lay each new sheet over its neighbor's 10 mm overlap. Match both crosshair targets and the drawing. Tape the back, then cut the plate's solid outline.

Dashed frames and crosshairs are assembly aids, not dial cuts. The frame sits 10 mm from the left and right paper edges. The matching gnomon template and mounting instructions follow the plate sheets.

Horizontal · 45.00° N, 0.00° E

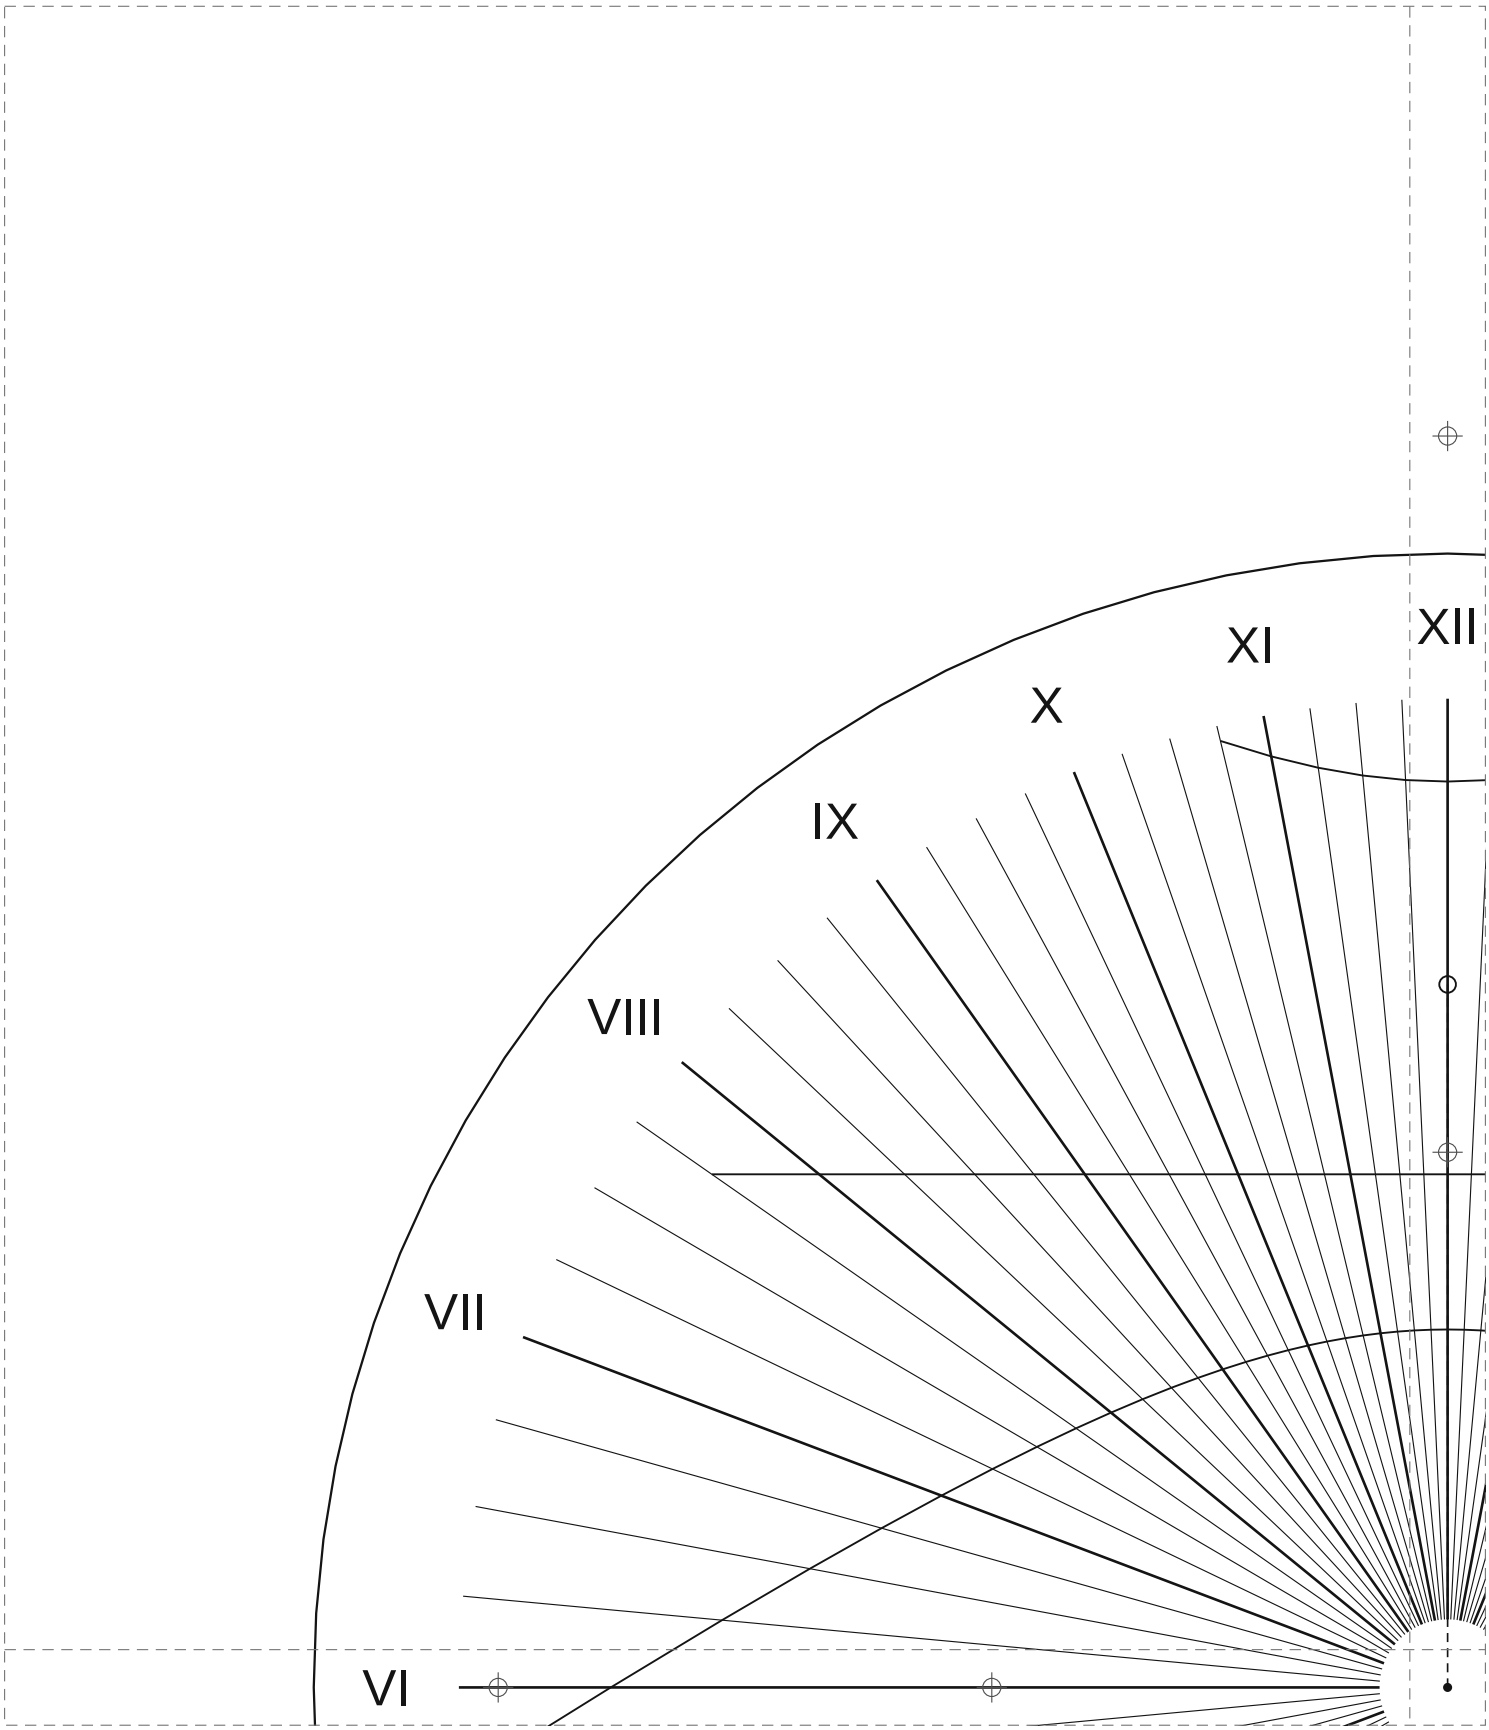

Horas non numero nisi serenas

Horizontal · 45.00° N, 0.00° E. Local apparent solar time. UTC; design date 2026-06-21. Radius 150 mm. Lay flat with the top of the design toward true north. The style rises 45.0° above the plate toward the north celestial pole. Nodus 48.0 mm along the style from its foot.

100 mm calibration - verify before cutting

R1C1 / 2 rows x 2 columns

Drawing origin x 0.0 mm, y 0.0 mm | 10 mm overlaps

Join: right R1C2 / below R2C1

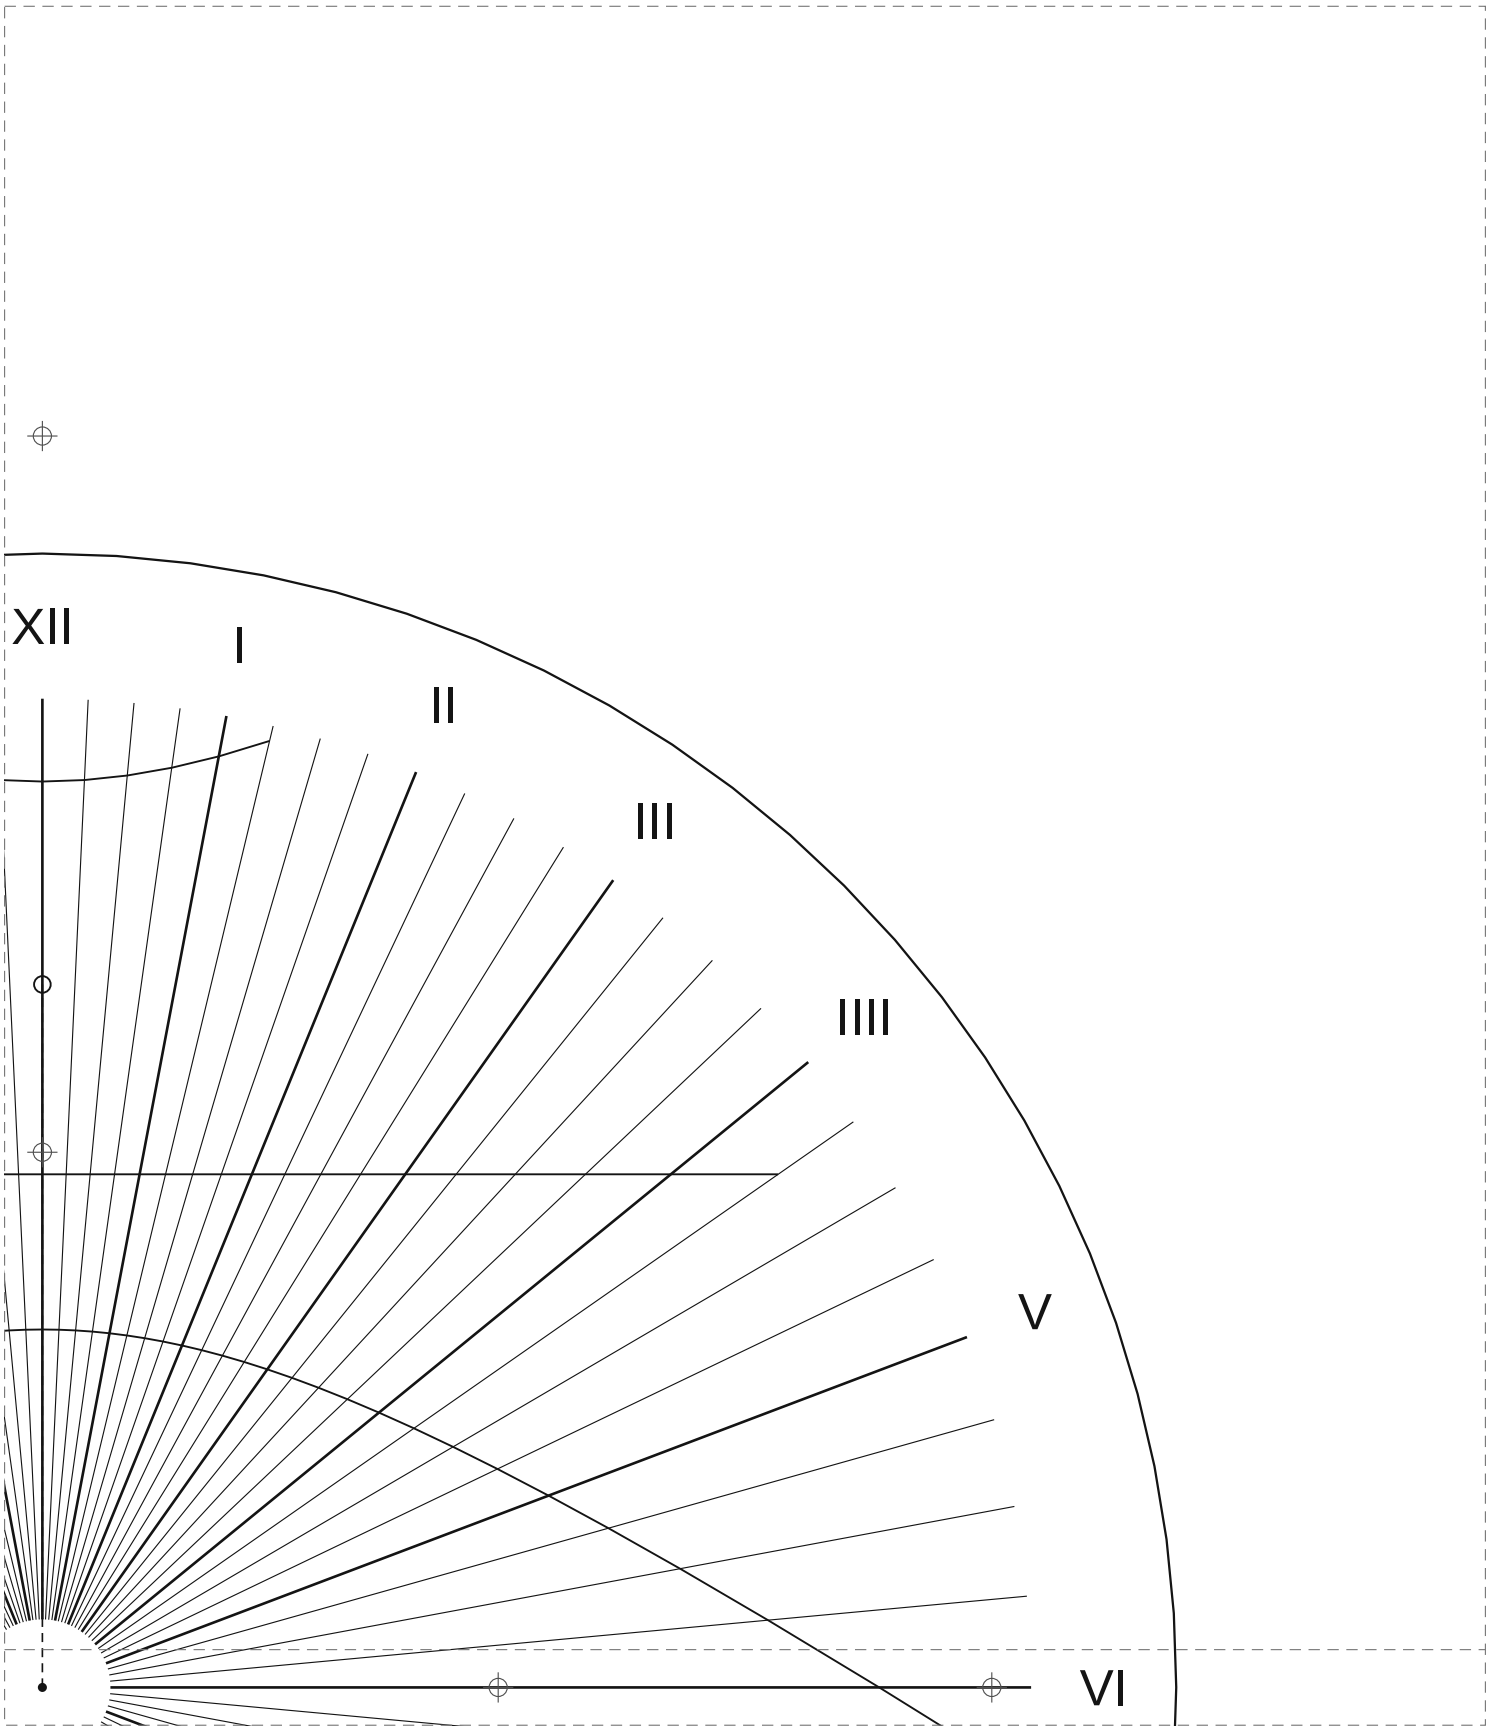

Frame 195.9 x 227.4 mm - check both axes

Gnomon - cut and fold

LETTER | plate radius 150 mm | print at Actual size / 100%

Cut the solid outline. Fold the tab 90 degrees at the dashed base. The triangle stands perpendicular to the plate; its sloping edge rises 45.0000 degrees above it.

Mount the plate on flat backing. Match the filled foot dots and the open base-end circles; align the dashed base with the plate's dashed mounting line. Secure the tab to the backing; it may overhang a fan's point.

Base 93.00 mm; rise 93.00 mm; style edge 131.52 mm. Keep the triangle upright, not laid flat on the plate.

The cross marks the nodus, 48.00 mm along the style from the filled foot dot. Add a small bead or notch there to cast a distinct date-line shadow; an ink cross alone will not do this.

Use a thin shadow-casting edge. Material thickness, kerf and fold allowance are not compensated in these templates.

Lay flat with the top of the design toward true north. The style rises 45.0° above the plate toward the north celestial pole.
